GRAFFITI REMOVER

For use on painted or coated surfaces.

Removes paint, crayon, marking inks and grease.

DESCRIPTION: Graffiti Remover is a specially formulated product that will remove graffiti from most painted or coated surfaces. It will remove spray paint, permanent markers, crayons, and inks. Designed to dissolve gum on cement and stone walkways.

DIRECTIONS FOR USE: Graffiti Remover should be applied full strength to the surface using a pump sprayer or brush. Allow a 1-2 minute contact time, then wipe clean with a clean cloth. If the surface needs additional attention, repeat the procedure. On porous surfaces or aged graffiti it may be necessary to scrub the surface with a soft bristle brush.

Graffiti Remover has been tested on most surfaces without damaging effects, however a small trial application is recommended to insure compatibility with the surface being cleaned.

SAFETY: When using Graffiti Remover be sure to check the HMIS chart for proper safety attire to be worn. Use only in a well ventilated area. Wash thoroughly after use and before eating.
