## LIQUID LAUNDRY DETERGENT

**GENERAL DESCRIPTION:** LAUNDRY DETERGENT is a liquid detergent concentrate containing a specific blend of soil suspending agents, alkaline builders and optical brighteners to give a total laundering job when used alone or in combination with LAUNDRY LIQUID BLEACH or LAUNDRY BREAK.

This specific combination of highly active materials contains a unique blend of surfactants to give superior cleaning when used on cotton or synthetic fabrics and blends.

**USE DIRECTIONS:** LAUNDRY DETERGENT is specifically designed to be used with an automatic dispenser. LAUNDRY DETERGENT can be dispensed directly from the shipping container, thereby eliminating hand feeding from powder hoppers and possible misuse.

**CONCENTRATION:** For normal soils, use 8 to 12 ounces per hundred pounds of work.

**TEMPERATURE AND TIME:** LAUNDRY DETERGENT is completely soluble at all normal water temperatures. For optimum soil release use in hot (140E-160E) water for removing normal soils. Effective soil removal at the concentrations and temperatures given may be obtained during a normal 6 to 10 minute wash cycle. If extreme soil conditions exist, a longer or repeat cycle may be necessary.

**USE PROPERTIES:** LAUNDRY DETERGENT is a unique detergent blend with a specific balance of ingredients to provide effective soil removal in any normal water hardness when used on cottons and synthetic fabrics. DO NOT USE ON NATURAL SILK OR WOOL.

**TITRATION:** ½ oz/gallon-3 drops/10 mls. using the institutional Titration Kit and 0.5n acid solution.

**CAUTION:** Alkaline liquid. Do not take internally. If swallowed, induce vomiting and call physician. Avoid contact with eyes, in case of splashing, flush with water for a least 15 minutes and get medical attention. KEEP OUT OF REACH OF CHILDREN.

### SPECIFICATIONS:

Penetration	Excellent
pH @ ½ oz./Cat	10.7
Wetting Ability	Instant
Odor	Pleasant
Rinsing	Complete
Foam	Controlled
Biodegradable	Yes, all surfactants
Specific Gravity	1.1 (9.16 lbs. per gal.)
Phosphorus Content	1.1%
