**POWER KLEEN  
POWDERED CONCRETE CLEANER**

**DESCRIPTION:** This yellow tinted, free flowing powdered detergent designed as a general purpose cleaner for use in food processing plants such as dairies, bottlers, canners and meat packers. It can be used in restaurants cafeterias, warehouses, service stations and garages.

**DIRECTIONS FOR USE**

**GENERAL CLEAN UP:** Food plant and restaurants - Mix 4 oz. To 1 gallon of warm water. The solution may be applied by brush, sponge, mop or cloth to concrete floors, walls, cookers, smoke houses, meat hooks and meat trees. Allow to stand for a short period of time and rinse off. Kitchen hoods, floor slats, resilient floor covering and painted walls - Mix 2 oz. To 1 gallon of warm water. Apply, let stand for short time, then rinse off.

**PRE-MIX FLOOR CLEAN:** Most all powdered chemicals should be pre-mixed when using cold or hard water. The colder the water the longer the pre-mix time. Allow 20 minutes in summer and 60 minutes in winter. Many dealers mix solution during day for the night clean-up man.

**METHOD OF APPLICATION:** Always use a mop. Apply solution to DRY cement if possible. In case of rain or wet cement a stronger solution may be necessary. This assures a hard wax-like build up that makes islands shine.

**DWELL TIME OF SOLUTION:** This solution should remain on cement at least 10 minutes or until dry. This will give the desired "soaking action" that will emulsify oils and grease, speeding up the conditioning process. Hose or mop off.

**CONDITIONING CEMENT:** For the first 30 days pre-mix using 1 qt. To 32 gallon water. After 30 days pre-mix 1 qt to 5 gallons water.

**RESTROOMS:** Unsurpassed as a restroom cleaner, this product cleans and deodorizes the entire restroom. No additional deodorizer is needed.

**OTHER USES:** It will clean all parts of the station. It can be used to clean gas pumps, lube room equipment, walls and woodwork, or the removal of oil, grease or dirt from any painted or unpainted surface. Excellent for steam cleaners or pressure washers in the cleaning of motors or equipment.

**SPECIFICATIONS:**

Appearance.....Light yellow granular powder  
Odor.....Pine scented  
pH (1%).....12.0+/-0.2  
Foam.....Moderate to high (completely biodegradable)
