RINSE AID

DESCRIPTION: This product is a liquid compound designed to speed the drying, and prevent water-spotting of dishes, glassware, and flatware, in mechanical dishwashing machines. It also aids in the de-liming of the rinse lines and jets. It gives exceptional results in almost any water condition that may be encountered.

PHYSICAL PROPERTIES: This product is a green colored liquid weighing 8.65 pounds per gallon, acidic in reaction, with a pH of 3.5 at room temperature.

SUGGESTED USES: This product is usually introduced into the rinse-water line of a dishwashing machine either by means of a hydraulic or pump driven proportioner. The rinse injector proportions the product into the rinse water a rate of 2 ounces per 100 gallons of rinse water. For dip tank rinsing, use 1 to 2 ounces per 10 gallons of water at 180E to 190EF.

SAFETY: This product contains surfactants and a mild acid. See product label for safety precautions.

SPECIFICATIONS:

Color	Blue/Green
Fragrance	Detergent
Type of surfactants	Nonionic, Anionic
Phosphates	None
Viscosity @ 77EF	30 cps
pH	3.5 ± 0.5
Active Ingredients	29.5%
Specific Gravity	1.036
Hard Water Compatibility	Excellent
Shelf Life	1 Year Minimum
Grease Cutting Ability	Fair
Soil Penetration	Excellent
