FABRIC SOUR SOFTENER 7813

DESCRIPTION: Fabric Sour Softener 7813 is a concentrated fabric softener and time- proven sour additive in convenient liquid form. It is formulated to give a balanced pH to the finished work. Leaves all fabrics fluffed out and unbelievably soft. The sour-soft component, a time-proven additive with high neutralizing strength, was especially chosen for its "BIG" activity. A light straw colored liquid, pleasantly scented, designed to yield all of the features of both necessary neutralizing and softening ingredients.

ADVANTAGES: Fabric Sour Softener 7813 prevents yellowing and graying, reduces rejects by removing residual alkali, stripping hard water (lime) deposits, and helping to prevent and remove iron deposits. It also lubricates the fabric increasing the productivity for flatwork operations. Less wrinkling, sticking and static means increased ironer speed. Safe on cottons, linens, synthetics, and blends. By combining the sour and the softener in one convenient liquid, wash times and inventories are reduced. Fabric Sour Softener 7813 is compatible with all Flo-Kem laundry products.

USE DIRECTIONS: Fabric Sour Softener 7813 should be added during the final rinse cycle with 90-100 degrees water and low water level. Rinses should be no more than 3-5 minutes. If chlorine or oxygenated whiteners are used, the whitener and sour-soft cycles should be separated by 2 rinses.

CONCENTRATIONS: Use 3-4 ounces per 100 pound dry laundry.

SAFETY: May be harmful if swallowed. Avoid contact with eyes, or prolonged contact with skin. For accidental contact, flush promptly with water. For eye contact, flush thoroughly with water for at least 15 minutes and get medical attention.

KEEP OUT OF REACH OF CHILDREN.

SPECIFICATIONS:

Appearance	Opaque light straw colored liquid
Fragrance	Mild
Penetration	Immediate
Neutralization	Controlled
pH - ¼ oz/gal	1.5
Foam	Nil
Biodegradable	Yes, all surfactants
Specific Gravity	1.137
Stability	Stable
P.P.G.	9.47 lbs/gal
